

Ultra 250

Shown with Stainless steel body, optional heat deflector and external chemical injection system.

Therma-Kleen's propane-fired steam cleaner Ultra 250 is a clean burning, compact system designed to clean, de-grease and sanitize with pressure, low water volume, combined with adjustable steam temperatures, while maintaining an environmentally and safe work place by eliminating the need for most chemicals. This model can be customized with various water output volumes to meet your cleaning needs. Pumps range from .50, 1.0 and 1.5 gallons per minute. A Stainless steel steam hose is required with the .50 g.p.m. pump. All of our models are available in either a blue powder coat paint or an all stainless steel body.
