

Ultra 600

Shown with Stainless steel body, optional heat deflector and external chemical injection system.

Therma-Kleen's propane-fired steam cleaner Ultra 600 is a clean burning, compact system designed to clean, de-grease and sanitize with high pressure, low water volume, combined with adjustable steam temperatures, while maintaining an environmentally and safe work place by eliminating the need for most chemicals. This model is the same physical size as the Ultra 250, but provides more water pressure giving you the most cleaning ability for it's size. All of our models are available in either a blue powder coat paint or an all stainless steel body.

**Accessories:**

And a Instructional CD and a Owners Manual

**Propane-Fired Steam Cleaning Equipment**
